

Transportation Services

Clean Care Certified +

Our Clean Care process is our commitment to healthy and safe transportation!

As we return to school, we want to let our students, parents and staff know the steps we are taking as the situation around COVID-19 changes. Twin Rivers Transportation Services is taking our communities health and safety seriously and making it a top priority.

OUR COMMITMENT TO CLEANING

Our school buses and shuttle vans will be thoroughly cleaned and disinfected using EPA-registered cleaning products, following CDC guidelines before each evening.

- High contact areas such as handrails and seatbelt buckles will be cleaned throughout the day.
- Drivers have been trained and supplied with the necessary items to clean high-touch areas and the drivers compartment.

PROTECTING OUR STUDENTS AND DRIVERS

We have put in place a series of new driver procedures for our students and their protection, while still providing the best customer service possible.

- Drivers are required to wear facemasks. Special needs drivers may also be using face shields during close contact times.
- Students will also be required to wear facemasks during their ride on the school bus. Some exceptions may be made for special needs students.
- Buses will be loaded from the back of the bus moving forward. Students will also be required to sit in designated seats.

RIDING WITH CONFIDENCE

We will continue to follow the guidance provided by industry experts as well as the CDC and local governments as it develops.

- Our drivers, attendants, technicians and staff have been trained in best practices to keep students safe.
- Transportation services has made and will continue to make investments in cleaning products and other protections to safeguard our valued students and staff.
